MILLWORKS, INC.**
Specialty Millwork Products

THE ENVIROGUARD STORY

Most people don't worry about the durability of their windows until they have to be replaced due to rot. With the ENVIROGUARD window, they won't ever have to. ENVIROGUARD doesn't rot yet it's paintable and has the traditional look of real wood.

ENVIROGUARD is a cellular PVC material that is impervious to rot and insects. Precision Millworks uses only 100% ENVIROGUARD on the sash, sill and the exterior parts of its entire line of standard sized and custom built windows.

**We call it a technological breakthrough.
Homeowners call it a smart investment.**

All ENVIROGUARD double-hung windows have been structurally tested for wind and water resistance by a nationally certified testing facility.

FINISHING

ENVIROGUARD windows must be painted with Sherwin Williams® VinylSafe™ paint and receipts must be kept for warranty to be honored. See warranty information on our website (norot.com) for further details.

Precision Millworks also offers exterior pre-finishing as an option on all ENVIROGUARD window and millwork products. EnviroWood™ is our sustainable PVC option that offers the look and feel of real wood on ENVIROGUARD windows' interiors.

20-25 WARRANTY

We warrant our glass against seal failure for 20 years. ENVIROGUARD cellular PVC components are warranted against rot, warpage and corrosion for 25 years. See complete warranty details on our website (norot.com).
